Dr. R. Wolfgang
Sterling Chemistry Laboratory
Yale University
New Haven, Connecticut

Dear Dr. Wolfgang,

I was interested in your paper on ^{14}CO in J. Inorg. Nucl. Chem. (1960) in connection with CO "metabolism" on Mars. As you may know, CO has been detected there.

Do you know of any further work on the specific activity at atmospheric CO; or of any further reviews since Bates of the CO cycle?

Sincerely yours,

Joshua Lederberg
Professor of Genetics

P.S. Reprints of your papers on C chemistry would be welcome.
